

Hello Avşin and Ceyda !

I hope you are well ! I am going to talk to you about me. My name is Alice and I am 13 years old. I am studying at Immaculée Damville. I do horse-riding and I love reading, doing sport, and making pastry.

My biggest dream is very simple. I would like children (I love children), a big house and a lot of animals ! I love going to vacation in the summer with my family. I have a cute young sister ! I was born the 31st May 2007.

I am preoccupied by the environmental problems. I will try to find solutions to your problems. I am very happy to work with you for this project. I am sure we will get things done on our own scale! Plus you look nice haha!

ANSWERS TO YOUR PROBLEMS

1. Throwing household garbage on the roadside : you can stick awareness posters or organize a waste collection with your school.
2. Recycling bins are almost negligible/There is no recycling bin in our neighborhood, after the absence of garbage cans. : You can send a letter to the town hall to request recycling bins.
3. Lack of awareness of the importance of recycling : you can do awareness flyers to be distributed in correspondence books or in lockers or in letter boxes.

OUR PROBLEMS

1. There is too much food waste at the school canteen.
2. Some notebooks are not fully used and that wastes paper.

So we have also problem with garbage!

Lots of love,

Alice
