BEEKEEPING

BEEKEEPER

Is a person who keeps honey bees in special beehives (special boxes).

Beekeepers are also called "Honey farmers".

Many people keep bees as a hobby, other do it for income.

BEES

A honey bee is a eusocial, flying insect.

Honey bees represent only a small fraction of the roughly 20 000 known species of bees.

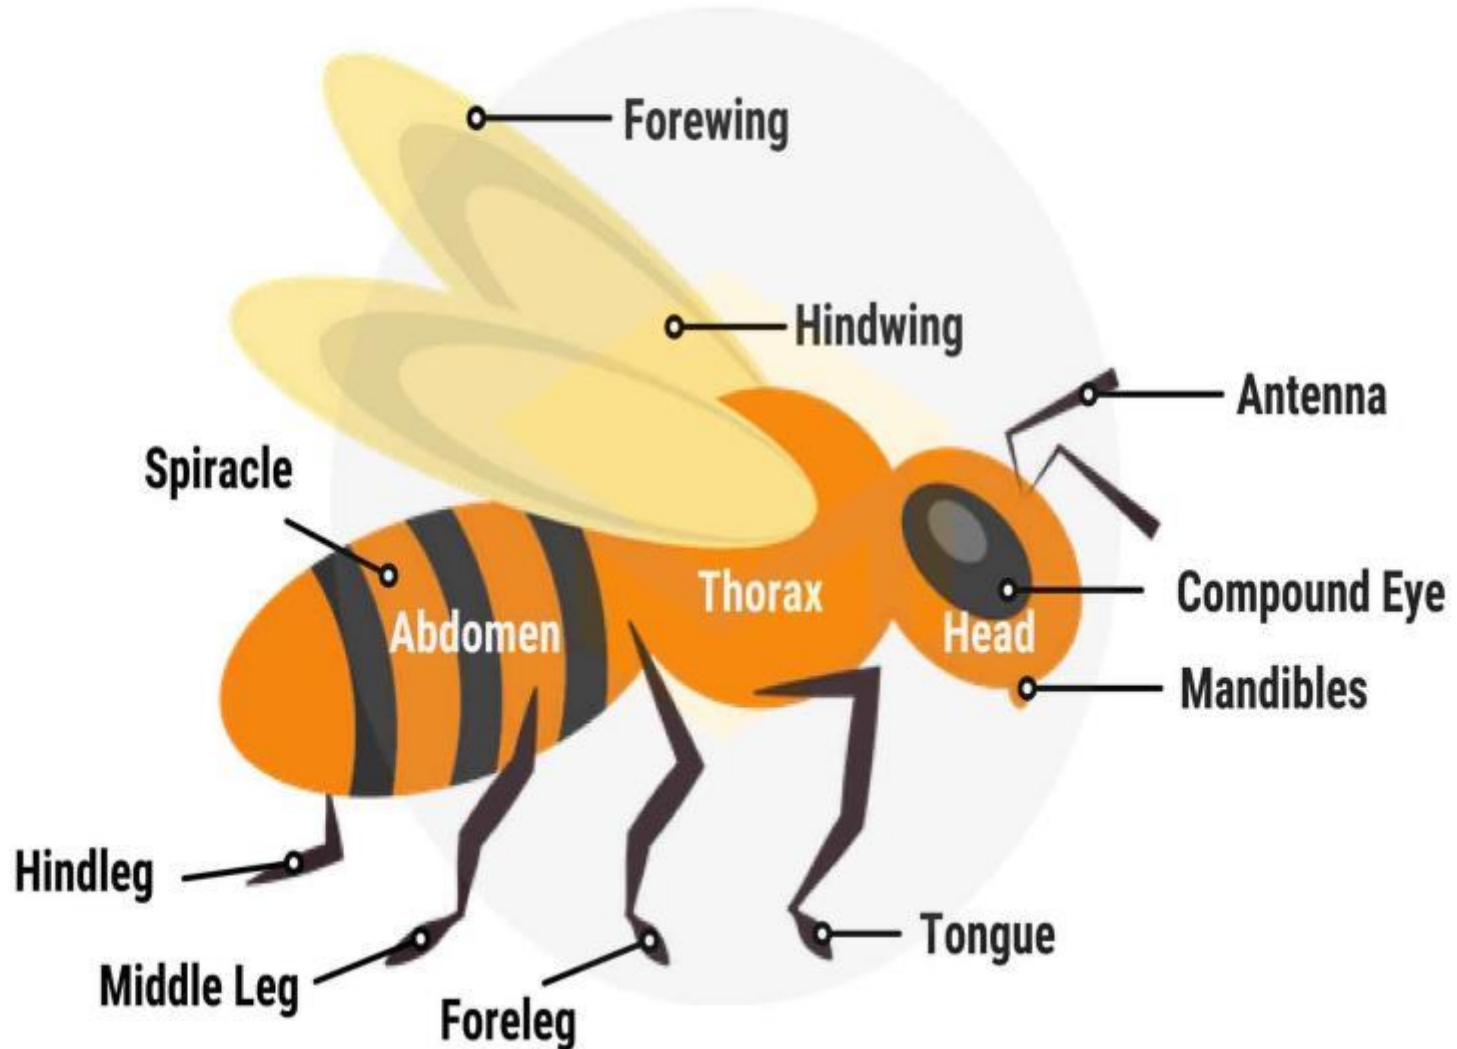

Diet of a bee

The honey bee diet consists of two staples, both of which are produced by flowers: **nectar and pollen**. **Nectar** is the sweet water produced by and collected on plants like flowers, while **pollen** is a protein-rich powder.
