Detailed agenda and any documents used or distributed at the transnational project meeting

Extending CLIL in the classroom - the teachers attended workshops and some classes where they got to know how CLIL works. They then prepared presentations for their peers using the CLIL method of teaching. The Slovenian teachers taught a lesson on Slovenia which was used as a good practice lesson showing how CLIL methodology can be applied to the subject of Foreign Language teaching. They really were a great help in creating a good English lesson!
