

TYPICAL WEATHER IN BARCELONA

In Spain the weather is really nice, we have very cold winters, and really hot summers. Spain has a predominantly warm Mediterranean climate, with dry summers and winters with balanced temperatures, some winters are colder than others.

The most typically time to visit Spain is in spring, to March to May, because in these season these weather is normal, is not too hot or too cold, and on the fall September to November is very good the weather here.

In Barcelona the typical weather is nice. In summers the typical weather is around 29°C of maximum and 23° of minim, and in the winters the typical weather is around 15° of maximum and 8° of minim. I think for me in winters is very cold and in summer the weather is very nice. In Barcelona we have a very good weather.
