2 WRITE THE STORY

Certainly the most famous historical monument in my city is the Aiud Fortress. This monument enjoys a great popularity, because it has an opening to the national road, it is the only fortress in the city center, which occasional travelers in transit through the city of Aiud can see from a personal car. The fortress was recently restored through a structural project on European funds and can be admired in all its splendor, being visited annually by both Romanian tourists. Thus, the middle of the city of Aiud is preserved one of the oldest urban cities in Transylvania.

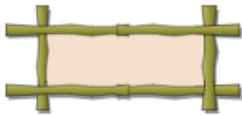

5

The fortress has thick defensive walls, which demonstrates its defensive utility. It is surrounded by a ditch of water, which unfortunately has not been preserved to this day. The 9 towers have the role of ensuring the security and protection of the inhabitants of the fortress, being constantly supervised by someone. The windows of the fortress and the walls are few, small holes that resemble in appearance the hole in the key of a door and as a function, their role was to defend.
