Deutsche Telekom AG is a German telecommunications company headquartered in Bonn. Deutsche Telekom was formed in 1995, as the former state-owned monopoly Deutsche Bundespost was privatized. Since it is privatized, Deutsche Telekom has featured among Fortune 500 companies with its latest ranking 86 in 2020. The company operates several subsidiaries worldwide. The company is a component of the EURO STOXX 50 stock market index.

History:

It was the major telephone company in West Germany. Until the early 21st century, Deutsche Telekom controlled almost all Internet access by individuals and small businesses in Germany. In September 2010, Orange parent France Télécom and T-Mobile parent Deutsche Telekom merged their operations in the United Kingdom to create the largest mobile network in Britain, EE. In April 2010, T-Mobile was merged with T-Home to form Telekom Deutschland GmbH. In February 2016, at the Mobile World Congress, in Barcelona, Deutsche Telekom jointly launched the Telecom Infra Project (TIP)

with Intel, Nokia, Facebook, Equinix, SK Telecom, and others, which builds on the Open Compute Project model to accelerate innovation in the telecom industry .Deutsche Telekom Global Carrier is formerly known as Deutsche Telekom International Sales and Solutions. It is an international wholesale arm of Deutsche Telekom .It operates a Tier-1 network and there measurements are based on international norms and standards.
