

## Tour de wind

---

Today you will go on a trip via bus to get your first views of wind power plants.

You will go to the north to a town called *Cuxhaven* and learn several facts about engineering, nature protection, onshore and offshore wind power, the harbor of Bremerhaven and lots about (northern) Germany.

During your trip you will learn the information to fill in the answers to the following questions.

- In which year did the „*German centre for Offshore Industry*“ in Cuxhaven (DEUTSCHES OFFSHORE-INDUSTRIE-ZENTRUM) start to work?

\_\_\_\_\_

- There are only some parts of the windmills (not the whole constructions) which are shipped via Cuxhaven to the offshore-parks.

Name some of them:

\_\_\_\_\_  
\_\_\_\_\_

- What is the weight of the biggest parts?

\_\_\_\_\_

- At what height is the highest centre of a windmill?

\_\_\_\_\_

- How many anchorages (places for ships) are located in Cuxhaven for the offshore ships?

\_\_\_\_\_

Tell us in some sentences about the most amazing topic/fact/story you heard about today.
