IIS Evangelista
Torricelli

Damien: We have to start first to be example to others.I think we can do great things if we work together and hope they 'll follow us

Caterina:couldn't agree more! Strict measures have to be taken.Let's lead this"campaign"

Francesco: I was thinking that we can propose to change at IIS school.

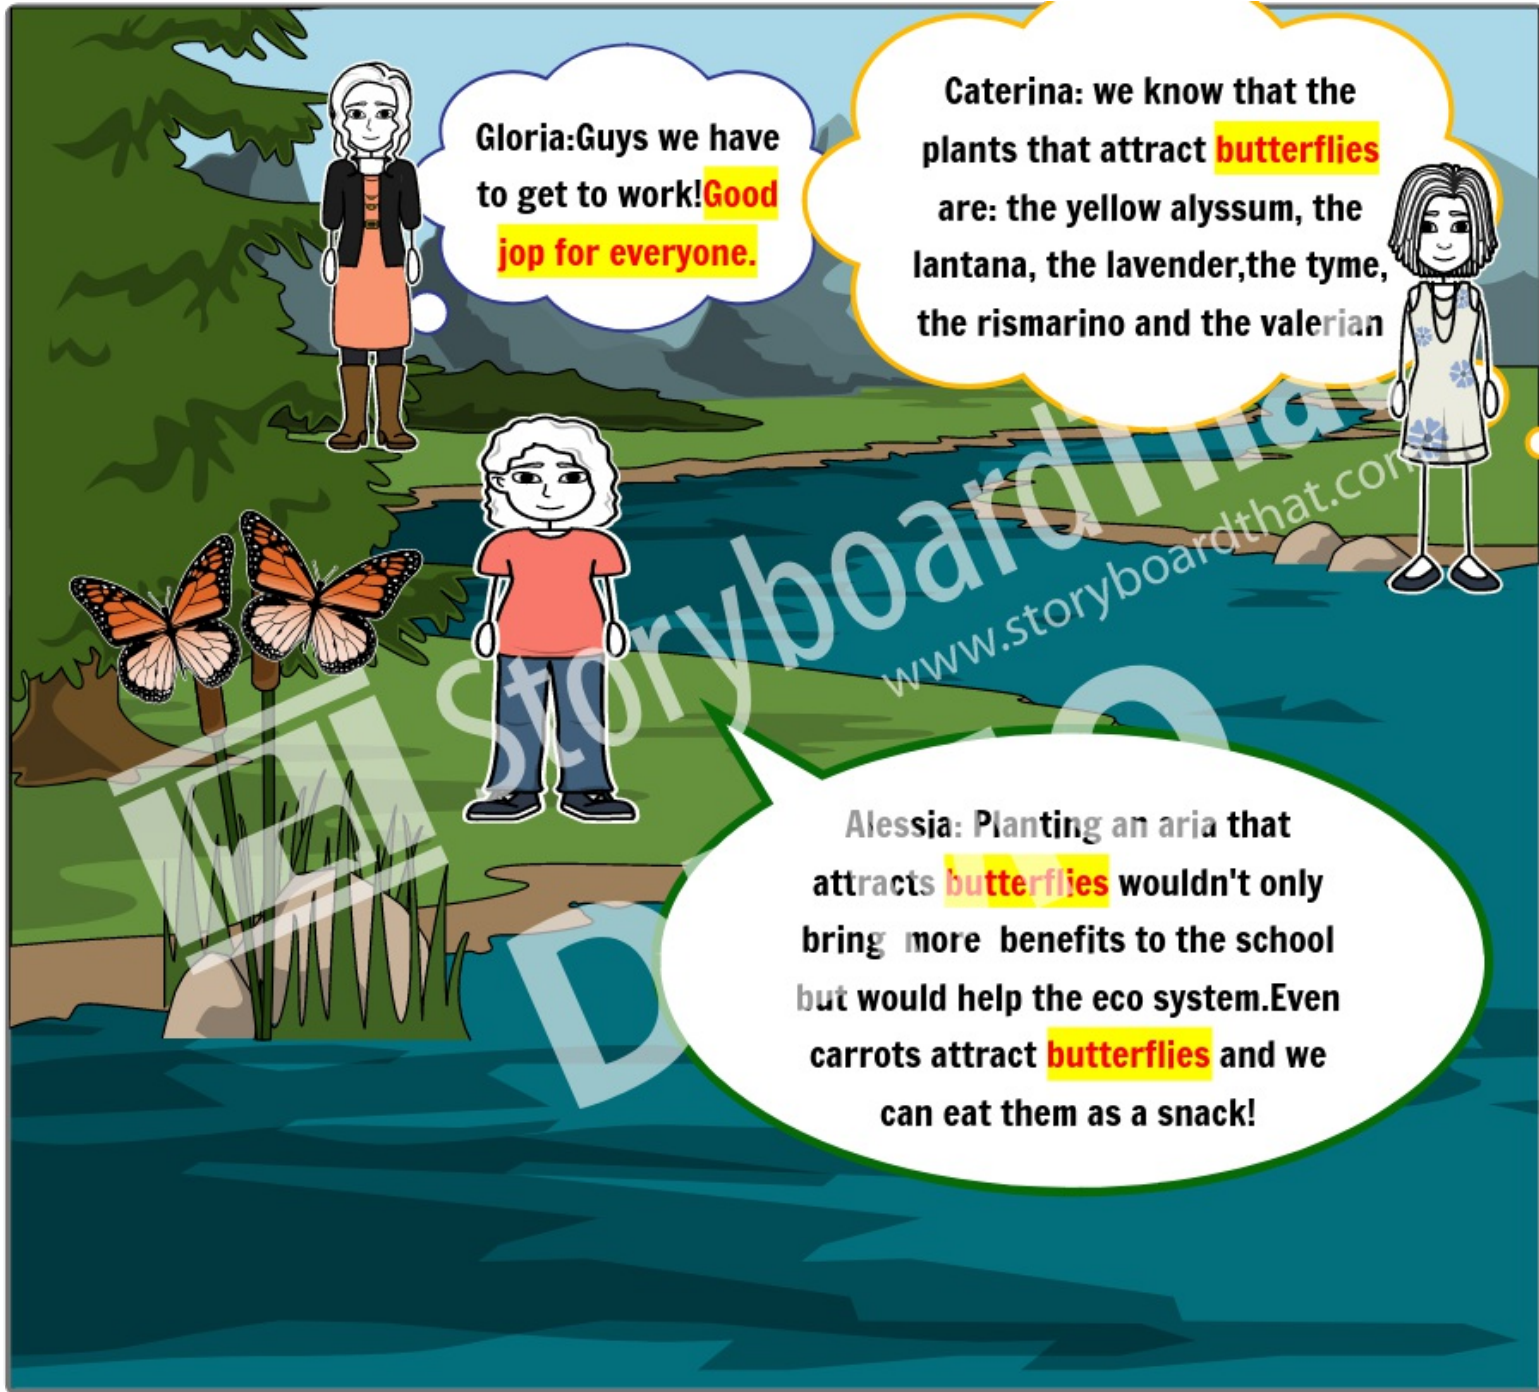

Gloria: How can we understand if the school air is pollution-free?

Chiara C: We could build a wooden fence and put in a series of plants, which butterflies feed on nectar and at the same time put some where these can lay their eggs. **What do you think?**

Alessandra: Hi guys, let's start our mission. I'm your **butterfly** and I have the capacity to respond to a perturbation or disturbance by resisting damage and recovering quickly.

Chiara M: I'd like to create a very colorful small garden with the help of tulips, iris, narcissus and violets.....and very welcoming with the recycling of wooden boxes, iron bins or wooden table by building benches and tables.

Gloria:Guys we have to get to work!**Good job for everyone.**

Caterina: we know that the plants that attract **butterflies** are: the yellow alyssum, the lantana, the lavender,the tyme, the rismarino and the valerian

Alessia: Planting an aria that attracts **butterflies** wouldn't only bring more benefits to the school but would help the eco system.Even carrots attract **butterflies** and we can eat them as a snack!
