

Łęczycze, 22/1/2018

Hello, Everyone!

We're really glad that we can take a part in the Etwinning with You. We hope it'll be an interesting experience. Now let us introduce ourselves.

Let's start from the main information about us. We go to the First High School in Łęborg. It was founded in 1945. The building of our school looks like Hogwarts so it isn't surprise that somebody calls it like that. Is it school of witchcraft? No (fortunately or not).

Members of our project's group are in different classes. We've got here four main profiles: biology-chemistry, maths-physics, geography – maths and geography-history. We're 16-19 years old. Even though we have different interests we are connected by one: English. Or willing to know people from all around the world.

We entered this project to find out about safe surfing the net and to improve our English skills. We believe that everyone after the end of it, will be content of cooperation. It'll be pleasure to write with you and to know you. We're looking forward your emails.

XOXO

I High School in Łęborg
