

GERMAN
Improve our recycling through motivation.

If we motivate people to recycle, we can enjoy the world we want and live our life in a better way.

For example: in Germany and in Finland they ~~pay the citizens~~ ~~to recycle~~ give little amounts of money to citizens and ~~companies~~ companies for recycling.

Another way to ~~recycle~~ motivate to recycle it's through the "Green game".

It has two parts: first, you receive a lesson about recycling; then, after this, you do a recycling quiz.
