

SPAIN

3 main ideas about...

Recycling.

- We promote to have a machine that changes bottles for money.
- To have paper bins at the classrooms
- To have more tetrabrick bins at the playground, and some for cans too.
- To have some specific bins in the toilets for sanitary towels.
- To make an Ecoteam, and they will help to keep the high-school clean.

Entrepreneurship

- We are making an app to share the high-school news (so we will save paper)
- We think that we can create a service to care for elderly people and students with special needs. It can be financed by the government (so the social worker just works a few hours), or by the family (so the social worker works more hours).
- We would like to have a printing service at school for students.
