

# *How my country was and how it is*

The castle of sant'Antimo testifies that in the past the surrounding lands were chosen by the lords as a hunting reserve for the beauty and health of the land.

The cultivation of walnuts was one of the main activities, the fields of walnuts were scattered in the land around the small town

**Now...**

Many of that has turned into illegal landfills

I am a victim too of environmental degradation, unfortunately these are the streets of my city.
