LEARNING 4 TOMORROW

www.learning4tomorrow.eu

Critical Thinking

Students' ability to analyze, interpret, evaluate, make decisions and solve problems.

Creativity

Students' ability to brainstorming, refining ideas, be open to other's ideas and present the ideas in an achievable and useful way to others or the project.

Collaboration

Students' ability to work with others to achieve a goal. It requires flexibility and responsibility in the group.

Communication

Students' ability to share information while expressing their thoughts, feelings and ideas clearly to others. It requires listening and evaluation skills and may include written, verbal and multimedia messages.

EXAMPLE TOOLS

Critical Thinking

Students use research tools to investigate and report on topics.

Search Engines

Open Online Libraries

Wikis

Virtual Tours

Google Arts & Culture

EXAMPLE TOOLS

Creativity

Students use digital tools to produce and showcase digital products demonstrating learning.

Posters
Flyers
Presentations
Covers
etc.

Download in .jpeg/.pdf/video

Personal blogs

<http://something.blogspot.com>

You can upload and embed soundtracks

<http://username.wixsite.com/pagename>

EXAMPLE TOOLS

Collaboration

Students use digital means to work collaboratively on projects, written products and for conferencing.

Online calendar and team event creation

Online surveys and polls

Communication

Students communicate by digital means to foster interpersonal skills.

WHAT IF you want to...

edit an image?

make a newspaper?

Scribus

Open Source Desktop Publishing

create graphic resources?

Do you know this keyboard shortcut?

WHAT IF you want to...

create a comic book?

showcase your work?

Google Sites

create online tests?

do augmented reality (AR)?

<https://quivervision.com>

WHAT IF you want to...

create online fun activities?

create and manage classes?

Google Classroom

Microsoft Teams

teach math, science and more?

teach code?

Code.org

Let's PLAY?

Online Quiz Platforms
based on gaming

KAHOOT

The questions must be projected or in a screen.
Play Live or assign Homework.
Get more points for faster answers.
Some options are not free.

QUIZIZZ

Quizizz does not require pupils to look at the screen.
Pupils respond to questions directly on their own device.
Questions can be randomized.
Funny memes at the end of each question (you can create your ones).
Turn on/off timer (get more points for faster answers).
Leaderboard on/off.
Play Live, Solo or assign as Homework.
Fully reports.
Students can review answer at the end (self learning).
Both questions and answer can have images.

How about a **VIDEO EDITOR?**

How do I make a video presentation about my school?

There are some free programs, most of them a little difficult to work by students.

FILMORA: The free version is a Trial and exports videos with watermark. It's the most intuitive to work for beginners.

POWTOON: Trial – watermark – 100MB storage – 3 videos/month – runs over the internet.

ALSO...

Did you know you can export your Powerpoint presentation in a video format?

Just go to FILE => SAVE AS => CHOOSE MPEG-4 VIDEO

But there are others...

REMEMBER:

All the following video editors depends on what you need, the specs of your computer and your skills level working with this kind of programs.

Check them out and choose the right one for you.

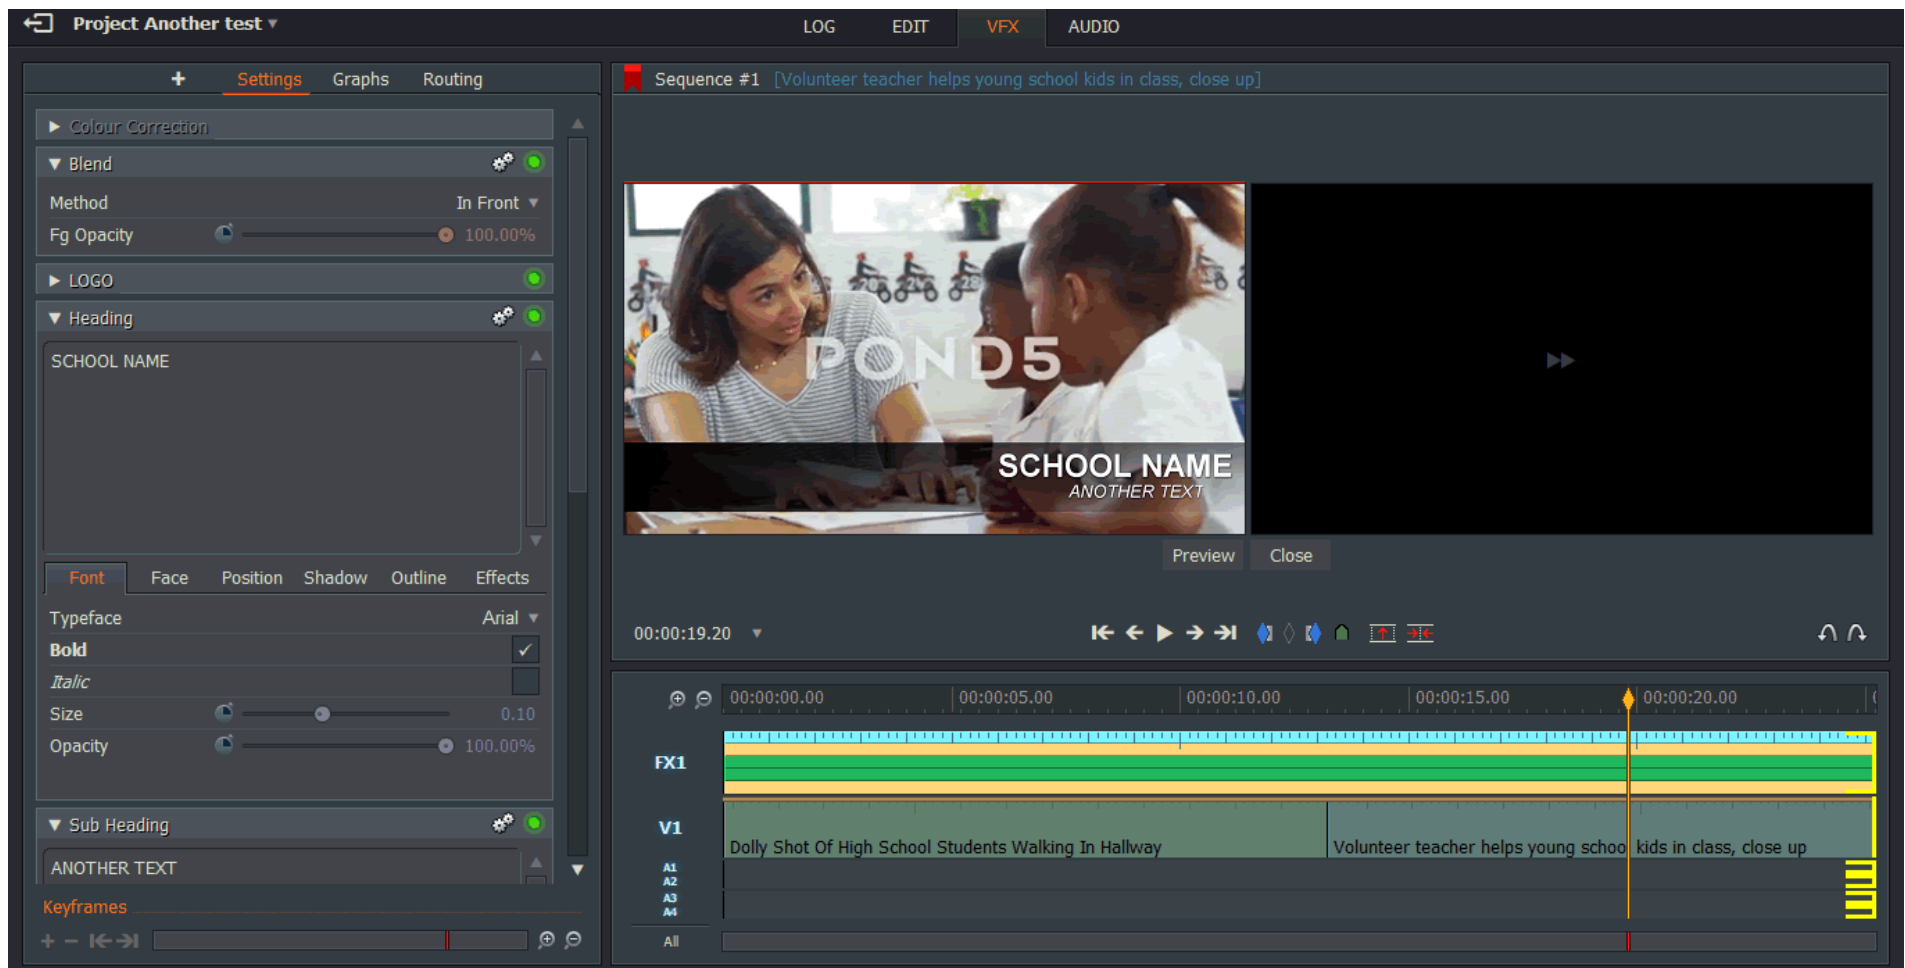

LIGHTWORKS

Intermediate to Advanced

Pros: Very powerful video editor with many advanced features.

Cons: Free version only exports 720px. Some users may find Lightworks too advanced.

On my computer the program was always shutting down.

HITFILM EXPRESS

13

Intermediate to Advanced

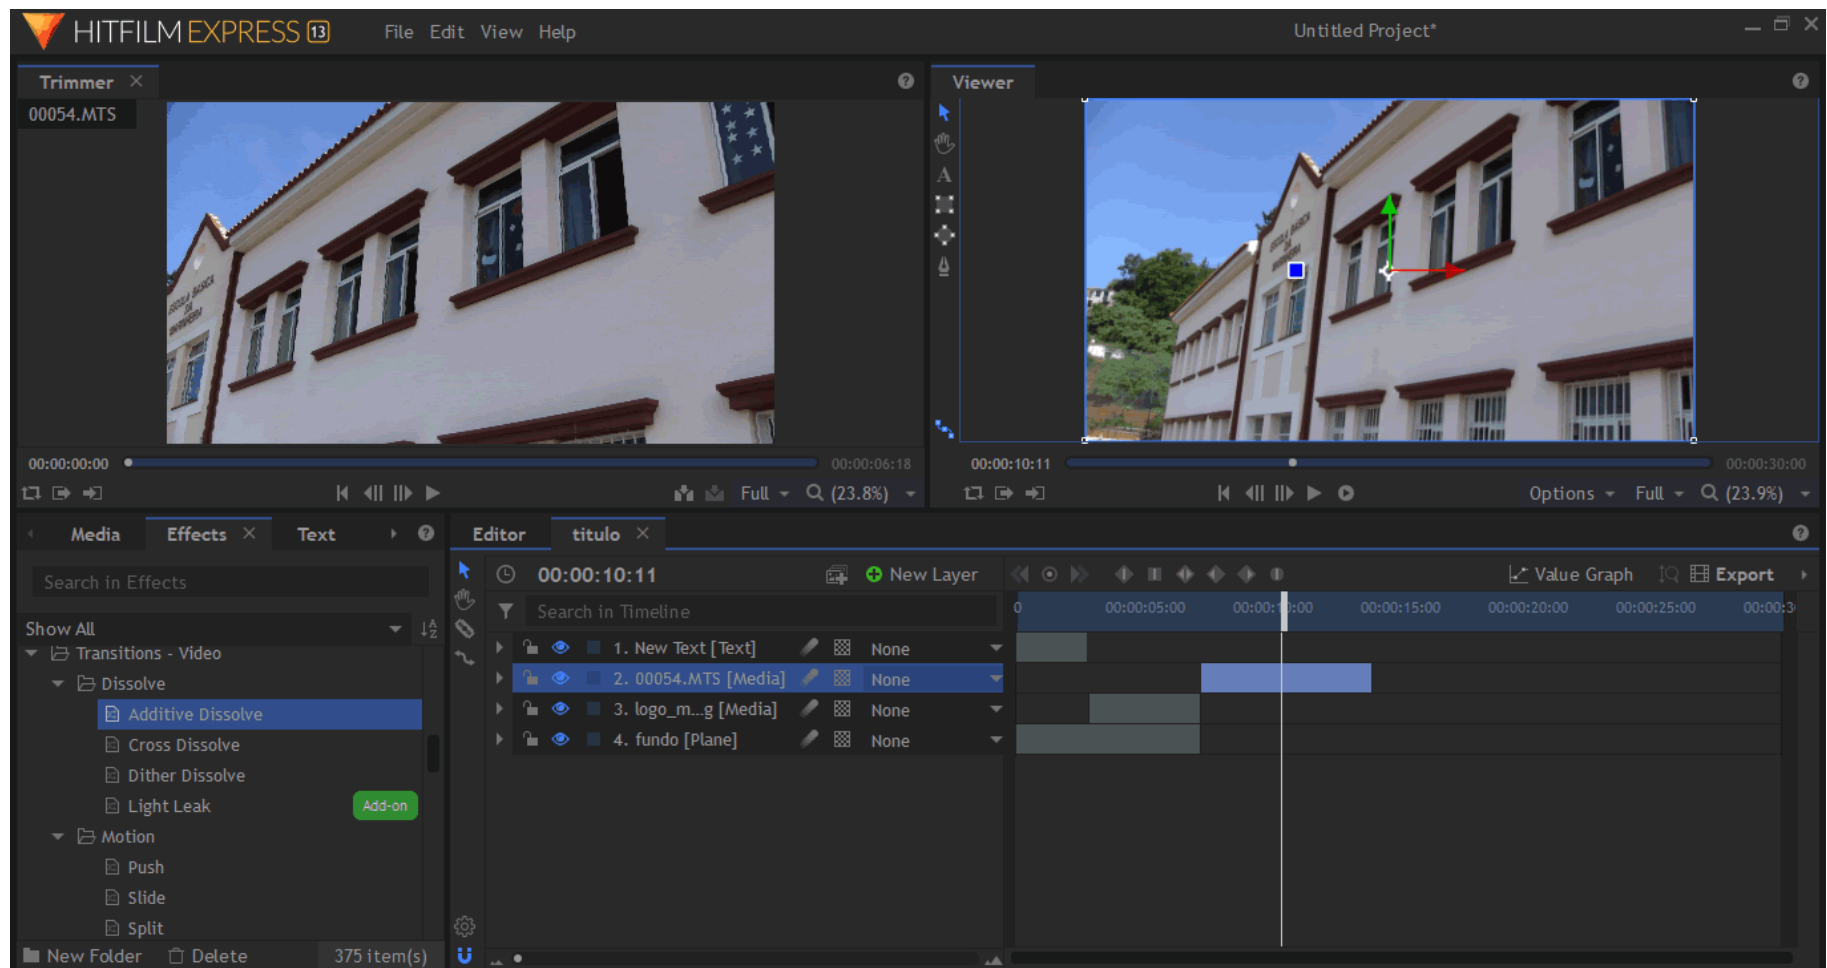

Pros: Truly professional video editor without the price tag. YouTube uploading is built in.

Cons: May take some time to learn the interface.

Mostly works with keyframes.

It's Free and has professional options

SIGN UP – INSTALL – ACTIVATE (FREE)

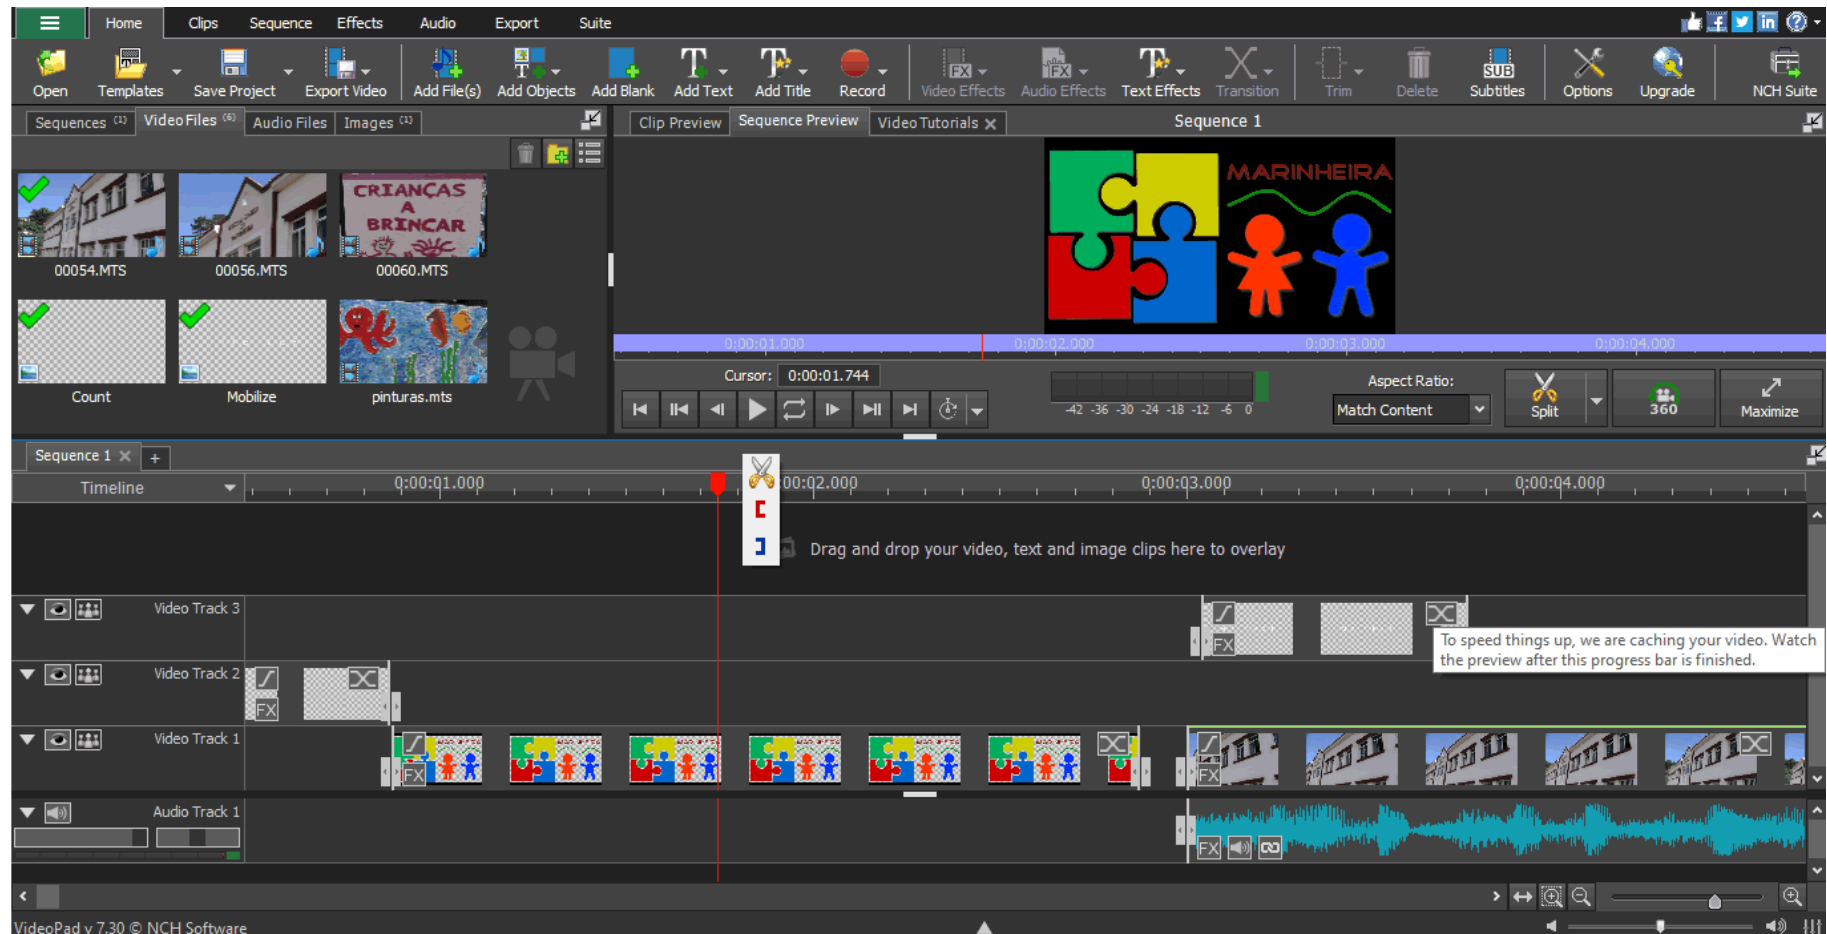

VIDEOPAD

Intermediate to Advanced

Pros: Has a timeline and robust features. Free.

Cons: Takes a little time to learn.

SHOTCUT

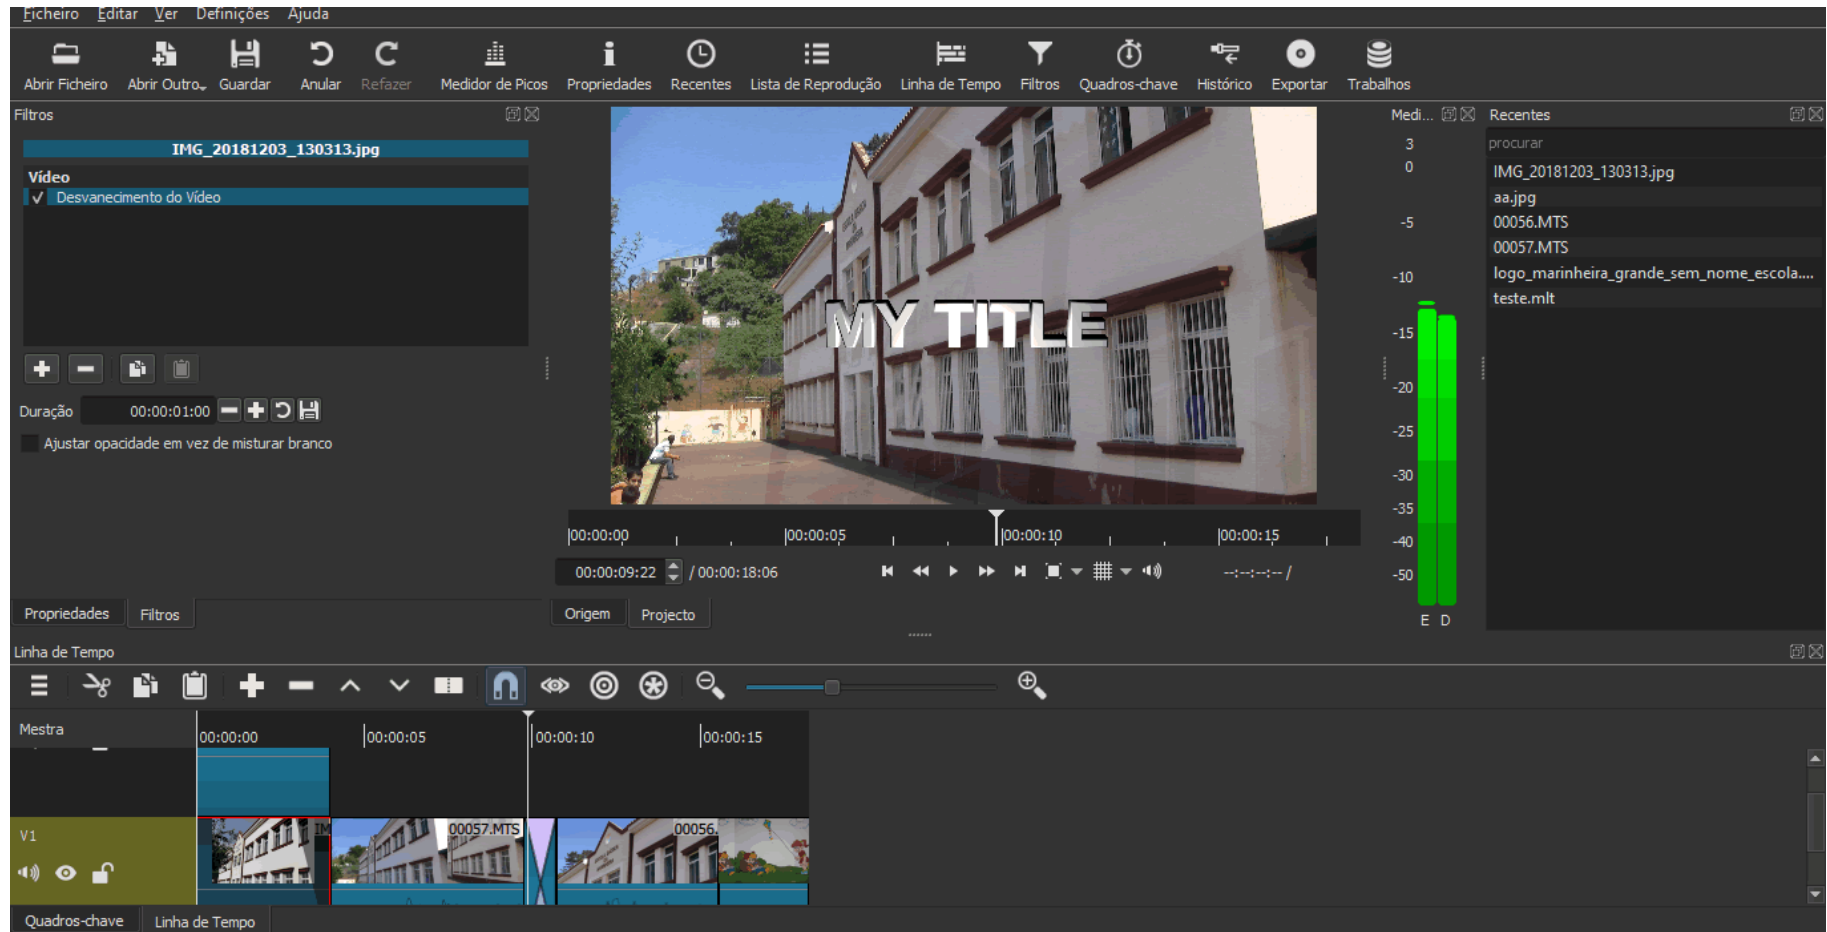

Intermediate to Advanced

Pros: Native timeline editing and 4K resolution support.

Has a portable edition.

Cons: Quirky interface may be off-putting for some users.

<https://shotcut.org/tutorials/>

OPENSHOT

Beginners to Intermediate

Pros: Most simple. Has some titles templates, transitions and effects. Works mostly with mouse right click and drag and drop.

Cons: Not many “professional” options of customization.
