

Methods of saving electricity at home

- ✓ Make it a habit to check that before leaving the house, check if you have left a burning bulb
- ✓ Analyze how much your TV consumes
- ✓ Teach family members to use the washing machine only when enough clothes are gathered
- ✓ Become accustomed to disconnecting the video console from the TV when the fun ends.
- ✓ Do not forget that your tablet, mobile phones and laptop use power even after the batteries are charged
- ✓ Keep in mind that your laptop will have a longer life if you sleep Shut Down instead of Sleep when you sleep.
- ✓ Keep in mind that old refrigerators are far less efficient than new ones
- ✓ Make sure the air conditioner does not consume more kilowatts than necessary.
- ✓ You already know that the electric cooker consumes more electricity than a gas cooker
- ✓ Use economic bulbs instead of filament lamps.
