

Parents

1. Are you aware of your child's participation in a two-year NordPlus project "Wonders in the country of science"?

Most of the parents are aware of their child's participation.

2. Have the themes and activities of the project had an impact on your child's interest in learning?

Some parents experience that their child talks about other project countries, and some more experience that their child talks about the experiments their children have done at school.

For teachers

1. What impact the project activities made on students?

The children loved the december project with daily science-experiments. They seem to be more aware of the Nordic dimension.

2. What impact project had for your professional development?

Some development according to science, but lack of equipment and knowledge makes it difficult.

3. What is your input into the project's website on Twinspace?

There are only two teachers who post at Twinspace in our school, and they have not always been as active as wanted on this platform.

For pupils

1. What was the most interesting activity in NordPlus project "Wonders in the country of science"? (September- January)? Why?

Most of the pupils liked our december project with daily experiments. Some liked to make cards for new year and send it to the other countries. Most of the pupils found the project interesting and fun.

2. What kind of new things have you learned about other countries?

Most pupils say that they have learned something about specific countries they have worked on. Some say they didn't learn anything.
