

To compare the size of the planet Venus (12104km) with the planet Pluton (2370km)

Is the same as comparing the Arc de Triomphe (50m) with the Heroes monument Kosovo, Krusevac (10m)

Explanation:

Pluton = 2370 km = 2370000 m

Venus = 12104 km = 12104000 m

$12104000 \div 2370000 = 5,1071729957805 \sim 5,1$

Heroes monument Kosovo (Krusevac) = 10 m

Arc de Triomphe = 50 m

$50 \div 10 = 5$
