

To compare the size of Asteroide Portugal (14000 m)
with the one of Venus (12104 m)

$$14000 : 12104 = 1.2 \text{ (aprox.)}$$

Is the same as comparing a computer mouse (0,10 m)
with a playmobil (0,072 m)

$$0,10 : 0,072 = 1,4 \text{ (aprox.)}$$
