EXPECTED RESULTS

FOR THE SCHOOLS INVOLVED IN THE ETWINNING PROJECT, WE WILL CREATE THE FOLLOWIN RESULTS:

The expected results of the eTwinning project will be similar to the expected results of the Erasmus+ project, but at an educative level, from a child/teenager point of view.

- An interactive book of good practices to avoid depopulation.
- Some recommendations to develop activities to avoid social exclusion of inhabitants in rural areas and to avoid depopulation.

FOR THE ERASMUS+ PROJECT IN GENERAL:

- Moreover, another result will be the compilation of all the information and activities related to the implementation and development of the ERASMUS+ project.
- A site not only for the collaboration among the partners but also for the dissemination of the project at European Level.

MAIN TASK FOR THE PARTNERS OF REDERA+

- **Propose to a Primary, Secondary or VET School to participate in the “eTwinning REDERA+ project”.**

Recommendations:

- **The teachers that will coordinate the project in the school must be registered in eTwinning. If they are not registered, they must do it in www.etwinning.net**
- **If they don't know how to use eTwinning, the can ask for help to their eTwinning National Support Service or to an eTwinning ambassador. They are teachers with a**

great amount of experience in the development of collaborative projects at European Level.

- **The teacher coordinator of the school interested must seek in “the eTwinning desktop” the names of Irena Crêsnar or María Jesús Parra and send us a request to be their contacts. Only after that, we can invite them to the eTwinning project REDERA+.**
- **We will give them more details once they are members of the project.**
