#CodeWeek

10 years

EU Code Week helps **millions of people** in Europe and beyond to learn, create, innovate and have fun with digital technologies.

Every year, tens of thousands of **schools and teachers** offer workshops, coding classes and seminars.

The EU Code Week **community** is a powerful source of inspiration and enthusiasm.

DIGITAL IS THE NEW NORMAL

All digital technologies are powered by lines of code – from the app you order food with, to the GPS you use to find the way. Learning how to code gives you a head start in this digital world, allowing you to control it, change it and even make it better. Code Week is about understanding the present and changing the future.

CODE WEEK EMPOWERS

Think of Code Week as a shared space between teachers, students, and people passionate about digital technologies and coding. Where people come for ideas, get creative, learn new skills, and share experiences. The place where teachers and students become more comfortable with technology. The place that inspires the education of tomorrow.

CODE WEEK IS FOR EVERYONE

EU Code Week is a grass-root movement run by volunteers who believe that coding means having power at your fingertips. They act as ambassadors, leading teachers and activity organisers on behalf of Code Week, encouraging others to join, to learn, create and organise coding activities.

You can become part of Code Week! Organise your own coding, robotics or computational thinking activities and pin them to the map. Or join existing activities and be part of a global community.

WHY EU CODE WEEK?

- Coding makes you creative
- Coding empowers people
- Coding is modern literacy
- Coding unlocks new opportunities
- Coding is for everyone
- It is the biggest coding initiative in Europe

WHAT IS EU CODE WEEK ALL ABOUT?

- Learning to code
- Organising coding activities, workshops and taking part in training opportunities
- Networking within your country and across borders
- Meeting others who share your enthusiasm
- Teacher training

WHY JOIN EU CODE WEEK?

- To understand the world around you
- To bring your ideas to life by creating something digital
- To gain lifelong practical skills
- To take first steps in mastering digital technologies
- To be part of a passionate community

CodeWeek.

HOW TO BE PART OF EU CODE WEEK?

Teachers of all subjects
can organise activities for children to use coding as a creative and problem-solving tool.

Parents
can encourage their kids to participate in coding workshops and practice with them at home event without computers.

Teachers
can take part in Code Week's free training courses, use resources in many languages and get inspired by peers.

Coders
can organise workshops in schools, community centres or libraries.
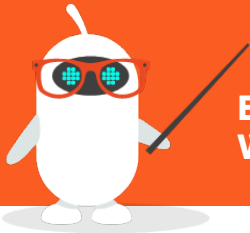

Non-profit organisations
can organise and promote workshops and coding events.

Businesses
can host coding activities, offer sponsorships, and let their staff work as coaches in coding activities.

Public institutions
can organise coding workshops, support schools and spread the word.

EVERYONE IS WELCOME @ EU CODE WEEK!
