

The waterfalls of Neda

There are only two rivers with a female name in Greece. One of them is called Neda. It is located in the south of Greece, in Peloponnese.

Its spring is located at the mountainous area on the border of two counties and it ends at the bay of "Elaia" at Kyparissiakos. The canyon of Neda, which is accessible during the summer months, is a truly magical journey for all nature lovers.

Along the Neda river course beautiful, picturesque waterfalls are created. The largest is situated near Figalleria.

QUESTIONS

- 1) How long is the river?(1)
- 2) Which villages does it flow through?(2)
- 3) How tall is the waterfall in Figalleria?(1,5)
