Minutes

Activities on agenda

The Turkish partner invites all students to take part in the forums/discussion groups opened in the Twinspace of the project.

Furthermore, all students have to complete the activities about fake news on the padlet uploaded in the Twinspace of the project.

In April partners will have seminars as well as any kind of activities about how to deal with anger and the relationship between anger and social media. All works will be gathered in an e-Book. The Romanian partner (Irina) will create it by using “Canva” and will add all the other coordinators as editor in order to add their own works. By the beginning of May, the e-Book has to be finished and published.

It's agreed that in May there will be a final meeting with all the students in order to say goodbye and celebrate the end of the school year. Games and brainstorming activities will be planned a week before the due date by a coordinators' meeting.

Finally, all partners agree to ask for a further one year in order to keep on the whole program scheduled in the project. The Italian coordinator will write to the Italian National Agency to submit the request for one more year and the partners, too, will write to their NA.

It goes without standing that any activities are uploaded on the Twinspace of the project, on the Instagram profile and each partners agree to advertise the project on the school website and on the local press.
