Summary

Question

Individual

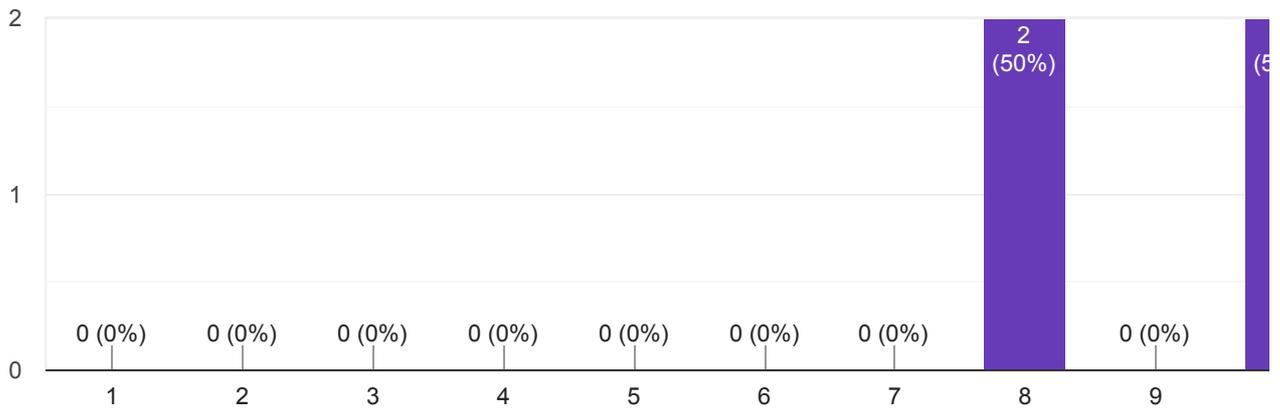

1. Has this project met your expectations?

4 responses

2. Has it been easy to work with your partners?

4 responses

3. In your opinion, what are the strongest and most positive facts of this project, from the coordinators point of view?

4 responses

We met before starting the project, and we established strong links from the beginning. We have made a very strong team and cooperative. We have been in touch throughout this time through messenger and we have transmitted this good experience to our school communities, above all our kids.

I would say great team work (students, teachers...) and regular communication have had positive impact in successful implementation of the project

The best part of this project is to be able to be in touch with schools from another countries and establish good links with them, most of all the mobilities to all countries belonging to the project and all the activities we do together. Also from coordinators to be in touch and organize, sharing our views and commitment towards the project.

From my point of view , we achieved a lot of aims from our project which promoted key skills and competences (approach to mathematics, reading and writing skills, communicating in English, developing ICT skills) . It developed entrepreneurship among students of our school, provided them with values that should characterize the entrepreneur: honesty, confidence, creativity, perseverance, responsibility, diligence, tolerance, solidarity, taught them to accept risk and leadership, promoted teamwork. I hope this project shaped the right attitudes of our students so that they grow up into good citizens, respecting and caring for others, developing their desire to create their own business

4. What have you missed or you think could be better, from the coordinators point of view?

4 responses

Sometimes it was difficult to do things together, or meetings, because of our own school schedules.

In my opinion everything was great

The communication or possibility to do things together was not the same for everyone. We have different timetables and sometimes our pupils could not meet some students online because of this reason. Sometimes we have too many things in our schools which keeps our project aside.

I think all aims of the project which were planned to do before Covid 19 pandemics were done. Our cooperation with partners goes very well, we exchanged ideas, planned project tasks together. We communicate using technical and IT tools: e-mail, Messenger, Facebook, e-Twinning, Skype, Twinspace. So , I would not change anything and I am very satisfied with this project.

5. This project could not be completed because of Covid 19 pandemics. How do you think it will affect our project? Do you think it will be possible to keep maintaining our project with online activities, meetings? What are your suggestions ?

4 responses

We had to stop our project activities due to the Covid 19 situation. However , our kids have been able to know one from another due to an activity in Padlet. I think that would be great to be able to keep in touch, and see if we could do our last mobility to Portugal, as they are really unforgettable experiences for our children.

Depends on the situation, but if we can't have the mobilities, online activities and meetings will be great to finish the last part of the project

Definitely, I think it is good for our pupils to keep in touch with pupils from another schools They have learnt and practice how to be an entrepreneur as well, and they have opened their minds to another cultures. We could keep some activities alive, by doing some skype meetings, or find out about their culture. We may not be able to carry out our last mobility to Portugal, which would be a shame, but on the whole, we have had a wonderful experience anyway.

I think positively about our further cooperation. I am sure that we will be able to keep maintaining and achieve goals through various online media. For now, the situation is difficult because we do not have the personal contact with students but I hope that we will come to school in September and organising online activities and meetings will be easier and of course, possible .
