SOCIETY

POLITICS

CULTURE

ECONOMY

I dream more equality among people in EU, there shouldn't be prejudices about religion, skin color, gender, nationalities and everyone should have the same opportunities for work and study

EQUALITY

LYFE QUALITY

I dream a better Life quality for all European countries, without discriminations, I think that thanks to democracy, the quality of Life has improved for many European states, but I wish all European people could accept and respect other cultures, customs, traditions or different skin colours

I dream that each european country share the responsibility of hosting immigrants escaping from war in their home country, but at the same time immigrants streactly respect the rules and laws of the host country.

The idea of European Union was born in the Middle Ages. The first king was Charlemagne, who created an important kingdom from Germany to Spain with the same laws, but he died when this reality ended.

THE IDEA OF UNITED EUROPE

This idea was reborn after the second World War. After 1945 peace settled in Europe and some European states started to cooperate to keep peace and economic development.

Today we can consider Europe as a political and economic organization, which includes 27 member countries. It also has 508 million inhabitants.

EUROPE TODAY

POLITICS

I dream that the European organization takes more into consideration the ideas of young people, even through Europe Direct, an organization present in every European Country, which focuses on young people innovating ideas.

CULTURE

- Acceptance of all cultures
- Stop racism
- Improve our knowledge by travelling

CULTURE

- Same syllabus in all European school systems
- Same learning and teaching methodologies in all European schools
- Free entrance to museums and libraries

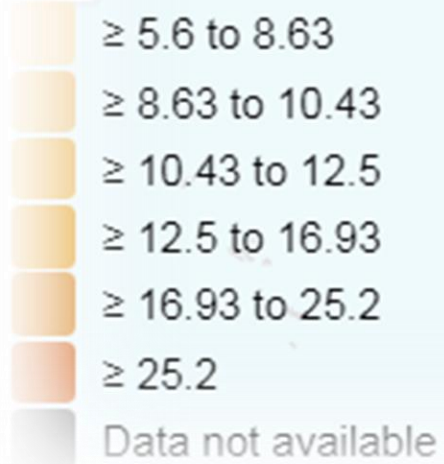

Thanks to the Erasmus projects we have opened our minds and we are breaking these barriers

CULTURE

The unemployment rate in our countries in 2019

Legend

Unemployment is one of the biggest problems in our countries.

I dream a Europe without unemployment and a job for everyone so that all people can have a safe future.

ECONOMY

TRANSPORTS

I dream to have a better public transports connection between the states in Europe to give everyone the opportunity to travel easily and discover our beautiful countries.

RESEARCH AND INNOVATION

I dream Europe could improve its economy through technological research, respecting environment and with sustainable development

If you wanna make the world a better place,
take a look at yourself and then make a change
