TESTIMONIES

I really liked going to Turkey. It was different from what I'm used to because the city was so big and had so many people living in it. The Turkish students in the project were nice and sometimes helped us by translating. Same goes for the teachers. They did a great job at organizing the activities and presenting their country. During some activities we were put in groups with students from different countries. Everyone knew English pretty well so we didn't have any problems with communication. One thing I noticed is that a lot of Turkish people just don't know English at all. And even in Istanbul we had communication problems with people there. As for the activities, I feel like they planned it out well. It was a mix of learning the Turkish culture, learning to communicate and entertainment. I really liked the escape rooms where our communication skills were put to test. I really enjoyed the time we were there.

Turški učenci in učitelji so bili bistveno drugačni od naših učiteljev in učencev. Bili so bolj direktni, samozavestni, pogumni, z manj znanja angleščine in so izrazili čustva in mnenja brez, da bi jih bilo sram. Pri predstavitvi Slovenije in vrat narejenih z 3D tiskalnikom, sem se zmešal, zmotil oz. pozabil nekaj posameznih besed. Nasplošna komunikacija z ostalimi učenci je potekala dobro, sem opazil da smo Slovenci najboljše vedeli komunicirati v angleškem jeziku.

Bilo je zanimivo vse, torej kako je potekal dan, okolica, stavbe, avti, trgovine, itd.. Slovenija je v primerjavi z nekaterimi deli Turčije pravi raj. Moramo ohraniti dostop do čiste vode in narave.

Temperaturne razlike (bilo je bolj vroče kot v Sloveniji), zelo natrpan urnik, in čas prihajanja v hotel ter premalo spanca (vsaj zame).

Učenci in učitelji tam so bili zelo prijazni. Slovenska ekipa se je najpogosteje družila s Portugalci in Italijani. Večina od njih je govorila angleščino tekoče medtem ko so nekateri učenci imeli probleme pri razumevanjih kakšnih bolj zapletenih angleških besed. Meni osebno komunikacija med udeleženci ni delala težav.

V Turčiji smo vsak dan imeli veliko zanimivih aktivnosti. Vmes smo potovali, sestavljali arduino projekte... Meni osebno ni bilo nič preveč zahtevno razen, ko smo bili v escape

roomu in sem se mogel pogovarjati z drugo skupino, saj je v tej skupini samo ena govorila pogovorno angleščino.

Teachers and students were very nice. We create some friendships as well. I was very satisfied with all events that happened. I wish you have two really good English presentations that were going pretty well. We also talk English very good. The most excited activity was a trip to Istanbul and escape room. In the escape room we talked English as well that was very important to escape the room. We learn something about Turkish culture as well. And overall Turkey was very nice and it was a very beautiful week.
