

**How to build  
feeders for  
wintering birds**

# What you will need:

Cones of all sizes and shapes

Vegetable fat or peanut butter

Mixture of seeds such as flaxseed, corn or sunflower seeds

Some string or wire

Scissors or wire clippers

# Instructions:

# Things to remember!

feed the birds only in winter, when there is a thick snow cover

place feeders in quiet, peaceful places, high enough to protect them from predators such as cats

use raw food, human food is poisonous to birds

Be systematic in feeding the birds
