Our twinspace and facebook page - how do you rate them regarding their content, updates, links etc.?

7 responses

Please make any suggestions which might result in improving them.

5 responses

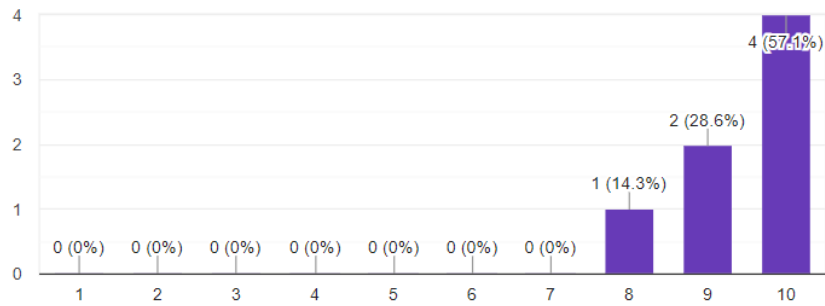

Twinspace might have more teachers and students engaged.

I consider our twinspace great. When it comes to the facebook page, due to the whole coronavirus thing it is not updated regularly, which can be improved when we go back to normal life and start going on mobilities again.

Some countries haven't included anything or very few materials

Newsletters - how do you rate their final versions?

7 responses

Please make any suggestions which might result in improving them.

3 responses

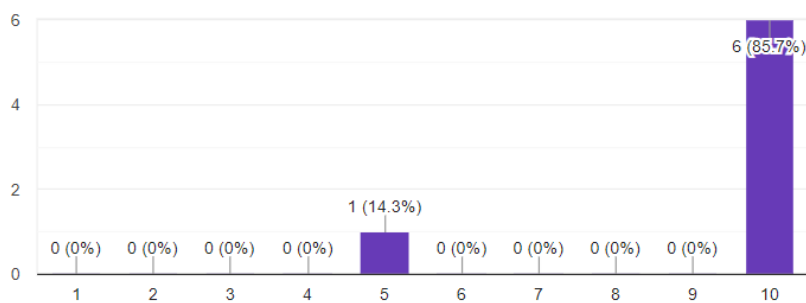

We have only seen the Croatian newsletter and it was perfect!

We haven't seen German newsletter yet. So that grade is for the Croatian one

Videoconferences - how do you rate their usefulness?

7 responses

Please make any suggestions which might result in improving them.

6 responses

I think they are a great way for making students more connected, to meet each other prior to mobilities and keep our project idea fresh.

We are already quite experienced practicing them a lot lately, so we don't believe we're encounter problems except a technical ones.

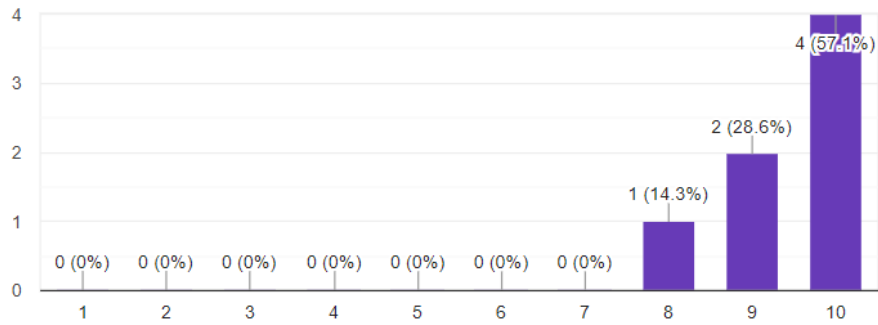

I think they are a great way of communicating with one another and seeing one another in this difficult time is a very good idea. They don't need to be improved in any way. The pandemic has shown us that we can do the video conference thing from our homes so now the fact that the school doesn't have appropriate equipment doesn't really matter.

I like them

The dictionary of proverbs and sayings - how do you rate the final product?

7 responses

Please make any comments on the positive and negative aspects of the process of creating the book.

4 responses

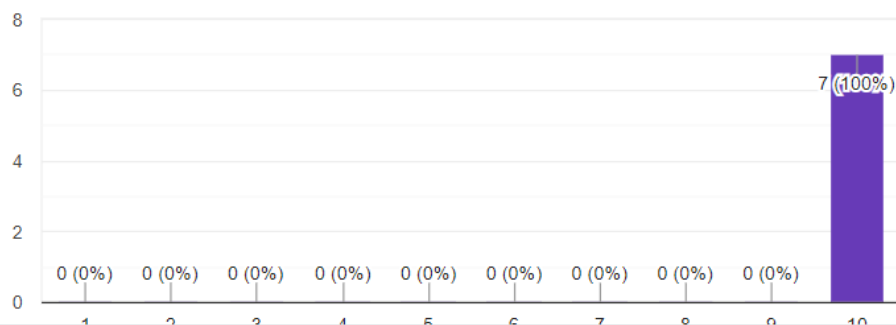

To my mind, the process of choosing proverbs should have been done more collaboratively because some of the proverbs have no equivalents in some partners' mother tongues.

I think the selection of the proverbs should have been more accurate since some of them didn't exist in some languages

Perfect.

Celebrating Europe Day 2020 - how do you rate the final product. i.e. the poster and the video?

7 responses

Please make any comments on the positive and negative aspects of the process of creating the poster and the video.

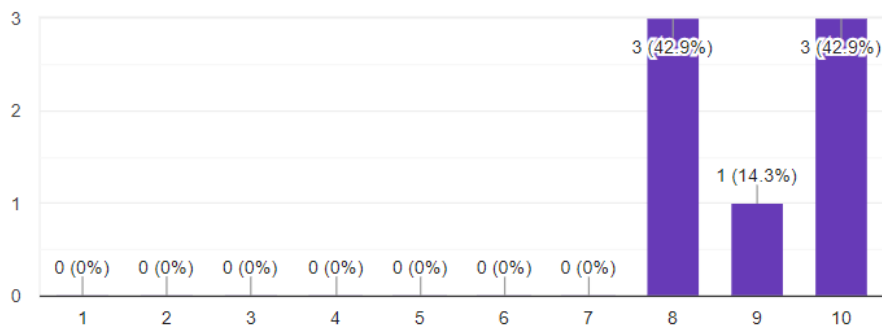

2 responses

Both the poster and the video were great. However, because we came up with an idea a bit too late and we had too little time, the video was not perfect. Next time we should think about such issues a bit in advance.

Cooperation between partners - how do you rate your partners' providing you with information, meeting deadlines and their willingness to partake in activities?

7 responses

Please make comments, positive and negative, as well as any suggestions for improving it.

6 responses

We are mostly alright.

All partners were pretty flexible regarding the deadlines, meetings, etc.

Some partners seem to do everything at the last minute or later than they should have because they are so busy with their schoolwork etc and I understand it. However, we need to work more closely and act responsibly as what we do affects all the partners.

It could be better if some countries would get more involved

Just positive comments. All partners are helpful and collaborating.

What is your overall opinion of the first year of our project? Did it meet your expectations?

7 responses

I like our topic and partnership is pretty good established.

The project implementation runs smoothly as imagined.

Yes

Yes, it did. I met wonderful people, I learn a lot all the time and I think what we do has a great impact on our students. They learn tolerance and become more open.

I love it!! We've worked a lot but students are really happy and teacher too!

Our project team is great and hardworking.

Please make any suggestions on how we can improve it.

6 responses

I am deeply sorry because of this corona situation. If it continues, I suggest more videoconferences, like at least one in two months, with the topics related to our project objectives. I am worrying we will become very distant before the next physical mobility, both teachers and students, it will be hard to get on the tracks again.

Keep up the good work !

I think there isn't much we can improve, maybe cooperation as I said before.

I've already commented them
