

# FIVE WAYS TO SAVE WATER

## **1: TAKE SHORTER SHOWERS**

Reduce your shower time and try to avoid baths when you can.

## **2: STOP PRE-RINSING DISHES**

Unless something is seriously burnt on, try really hard not to prerinse. It is an enormous waste of water, and most dishwashers are powerful enough that there's no need to.

## **3: CHECK FOR LEAKS IN THE PIPES**

Don't forget to check the outdoor faucets and pipes too.

## **4: STOP WASTING WATER IN THE SINK**

Turn off the water while you are brushing your teeth

## **5: TAKE SHORTER SHOWERS**

A typical shower uses five to ten gallons of water a minute. Limit your showers to the time it takes to soap up, wash down and rise off.
