

ORIGINAL SONG GUIDELINES

General description

All the project partners will have the chance to collaborate in order to create a project song. The project song should be about the project i.e. “making friends around the world.” The song should focus on friendship, culture and respect between people from all around the world. It should be about accepting people for who they are, getting to know them and collaborating with them! It should be about what makes your country unique and different.

All of the above ideas are acceptable for the song!

General guidelines

1. Think about how many students you want to involve in this activity. You may work with multiple classes, an entire class, small groups or a specific group of students. This is up to you!
2. Once you have chosen with whom you want to work, you must write song lyrics that have to do with what's stated above.
3. Only 1-2 song lines are needed from each country. If you have decided to work with multiple classes or groups then you may have a voting competition amongst your students to determine which 2 lines will represent your country.
4. Once you have your song lyrics go to <https://padlet.com/camilo/rosa1/makingsong> and add them to the padlet wall.
5. Once all the lyrics have been added the song will be created by combining all the lyrics.
6. The refrain can be translated into any language your students use. Even English speaking countries such as America and Australia will have students that know another language!

Extension activities

1. Get your musically gifted students to play musical instruments while others sing the song!
2. Connect on Skype to sing the song with as many partners as possible.
3. Ask your students to add their own rap to the song and record them singing it.

Don't forget to contact Angel, Camilo or Nick with any questions you have!

HAVE FUN DOING THIS ACTIVITY AND MAKE SURE IT'S ENJOYED BY YOUR STUDENTS!!!!
