SKILLS FOR FUTURE WORKING LIFE

Our project aims at improving the ICT skills and digital competences of students and teachers and at increasing the students' capability to access the labour market at local, national and international level and their knowledge of job and education opportunities.

Our idea is that students need to improve their digital skills and their entrepreneurship in order to improve their possibility of success in the labour market.

This last meeting will represent the necessary conclusions to our studies in the wonderful background of the city which has been the "mother" of all European culture.

The image shows the words "Ciao, Europa!" in a 3D, blue, sans-serif font. The letters are thick and have a slight shadow, giving them a three-dimensional appearance. The text is slanted slightly upwards from left to right.

This project is funded by the European Union
