

EVALUATION OF THE FIRST ACTIVITY

„GUESS WHO I AM“

SLOVAKIA

Students have made one picture and have written short description of themselves. We put this material on TwinSpace where all other teachers with their students could see them.

The task was to identify all children by their name based on their short description about them. There was a little clue into each description to identify all the children correctly. After successful identification we had to fill the table with names and numbers of all students from one country.

We received pictures and descriptions from Romania, Turkey and Poland.

I assess this activity of our project as

- - successful,
- - interesting,
- motivational
- supportive in English learning in its written form.
