

Youth of today:

Lectures about "Sustainable Developments goals (SDG)"

All of the countries have to make 1-2 short presentations about one of the 17 SDG
It was a very good way to combine the SDG with our theme of Erasmus Day "Youth of today"

Between some of the presentations we had a discussion about the topics.

- **Nr. 1: Germany: "No poverty"**
- about poverty especially about children in the world – let's make a difference in the world.
- **Nr. 3: Norway "Good health and well-being "**
- about being young and spending time at sports, make-up & social media – it's important to stay healthy
- **Nr. 3: Portugal "Good health and well-being "**
- about being sporty and find the right way of living your life. Not to criticised people who weight too much. And the important of social life and friendship.

- **Nr.4: Norway: “Quality of education”**
- about school life in Norway with a lot of examples from daily life
- **Nr. 4: Germany: “Quality of education”**
- About relationship between teachers and student now and for years ago. Respect is a key word.
- **Nr. 4: Portugal: “Quality of education”**
- About connecting between daily life and the thing you learn in school. Why do we learn about strange things we do not have an idea about to use in daily life? How to implement daily life problems for young in schools. The school in Portugal has a focus on educations stuff.
- **Nr. 12 Finland: “Responsibility of consumption & production”**
- About our consuming of new thing and about new stuff and material – be responsible for the environment and think recycling. About the climate problems in the world because of use of electronic and plastic. Let’s us think about where does it comes from we are living in a world with limited resources. Global changes are an ongoing process because of our way of living in the west. We can all do something to be a change for the environment. Think critical – buy be heart and not only by price!
- **Nr. 13 Finland: “Climate action”**
- About climate action and the deadline 2020 – we have to act now! We are not there at the moment – we have to do something now!
 - **Nr. 14 Denmark: “The ocean clean-up”**
- About a solution for clean up the oceans from plastic. A 14 years old boy has invented and runs a environmental friendly project to catch the plastic in the oceans to safe sea life!
