

SPECIAL SECTION

ERASMUS+ PROJECT “WE ARE READY FOR DIGITAL WORLD” BUBIAI, LITHUANIA, 6-10/12/21

A week full of workshops, conversations, exchanging ideas amongst teachers and students on Web 2 tools in education!

Studies on the use of web2 tools were carried out in this mobility. Participants exchanged ideas on utilizing web2 tools for specific learning needs. They shared their own tools and the benefits they have achieved.

Group work in an educational environment contributes to the development of skills such as effective and constructive learning, individual learning, and taking responsibility. Using Web 2.0 applications, the teacher brings life to the classroom thanks to the different activities, programs and products they share with the students. Web 2.0 tools provide more up-to-date and functional contents in the lessons and enable the teacher to share more information in a shorter time.

The following activities were held during this country visit:

- Courses, seminars, conferences related to Web 2 tools
- Workshop on making applications using web tools
- Cultural trips
- Activity report
