

KABOOM

Kaboom is a game which you can use for so many subjects, for example: science, math, language learning.

I will play with you in math's kaboom.

How to play:

1. Place all of the sticks in a mug. So that activities are not visible to children
2. Ask one of the students to pull the stick. The first child draws a stick.
3. If the student gives the correct result, takes the stick
4. If a student gives an incorrect result he gives a stick to the mug .
5. If student draws kaboom He puts it back into the mug.
6. If student draws a KABOOM stick, he must put back all of his sticks into the mug!
7. **The student with the most sticks wins**
