## ESC – a Global Challenge

What do you think could be improved in this kind of activities?

I think it was enough  
 the activities should be more From Reunion island, to discover more and more Reunion ISsland  
 Language should be more "clear" and we should all be together at the same time ( not divided in two groups).  
 More organisation...  
 I think that the organization must be better, we lost too much time to start doing the activity and then we must run to finish them  
 It's already good like this  
 they could be more useful  
 Usage of kahoot  
 More activities were the students are together ans mix  
 I don't know very well, for me everything was just great!!  
 more time for each activity.  
 More comunication  
 I think this kind of activities should be prepared with more time.  
 The communication between the students  
 I think it would be better if they do more activities in relation to the country

If you want, you can write here a comment about these activities, this kind of project, ...

That projects are an amazing oportunity to improve our experiences. I would love repeat that experience!  
 Makes it easy for us to be closer with the other countries  
 It's good for friendship  
 I'm so happy to be a part of this project.  
 This kind of project are fundamental to our lives, specially if we want to go further in our career paths. If we have this huge and indescribable opportunity, we can't let it go! No words can explain the happiness and the benefits it can give us! If someone ask me to apply again to this kind of projects, I would do it for sure!  
 I love this kind of projects because this way I can get to know other cultures and understand them better. I've realised people are wonderful no matter where you come from (I already knew this, but this kind of experiences make me prove these kind of facts) i would love to see these people again, and I am more aware of the damage humanity is doing to the Earth, so Im willing to waste lest resources  
 this kind of project are really amazing because the experiences can change our life and just if you went you can understand what is this of meet new people and live for a week in other country without your family....  
 It was the best experience  
 I would do it again  
 It is a good experience to improve student's English
