# ESC – a Global Challenge

## About learning/teaching/training activities

### What was the most interesting LTT activity?

- The visit to Merida
- Urban orientation activity.
- Visit to the Science and Investigation center 'Experimenta'
- Flamenco dancing and AcroSport performance at Llerena's Youth Centre

### What was the least interesting activity?

- None, all the activities were interesting
- The presentation of each countries
- Urban orientation activity

### What was the most interesting workshop?

- The making of soap
- The mural of caps
- The most interesting workshop was the game about saving energy
- The app of the portuguese team
- The recycling basket game made by Reunion Island.

### What was the least interesting workshop?

- None
- Flower planting

### What do you think could be improved in this kind of activities?

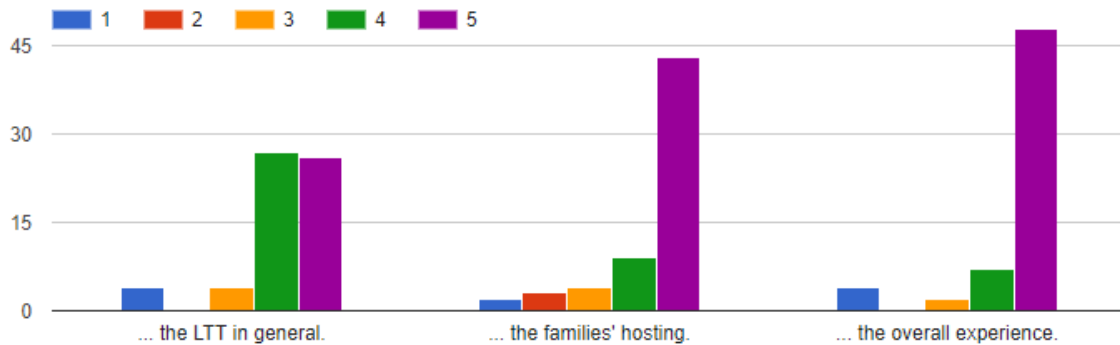

- The communication and interaction between the students
- Introduce new technologies on this activities
- Activities should be done in accordance with the project objectives
- Culture
- More comunication and interesting activities
- Maybe the preps. before going to a foreign country, to have everything done or almost done before traveling
- I think that the foreigner students should be more similar to the hosting ones
- Less presentation
- I think that all students should participate equally in the activities

## About this experience...

What mark would you give to...

## What does building an European citizenship for you mean?

I think , by sharing knowledge with others who share other cultures , we obtain greater knowledge and greater overall culture

I think it's to be able to open Europeans' eyes to their country, but especially to the World to improve their habits for the Environment or even for themselves. Thus, it's also to discover how people used to live and think about the best way to live.

According to me, building an European citizenship means discover a lots of cultures and in a same time to do a good campagne for sustainable development.

In my opinion it means to make someone being European by differents ways.

I think it's important to realize this awareness

For me it means, to build someone who's ready to share culture with others

It means that we should be more aware of what's going on in our world and we should have a more active posture towards the issues of today.

It learnt new culture and new friends.

Connecting with people from different countries

Is being united

A good opportunity

## ESC – a Global Challenge

I think that the building an European citizenship means that all people could be united without prejudice and discrimination

It means creating unity

Que tous les habitants de l'Europe partagent la même chose.

It means being closer to other countries

Globalization, peace-making

it means that the people involved in the project can create bonds that will be wealthy for a long time and that will be beneficial for all of us

I think all of us should have the same opportunities regardless the country we have been born in

Becoming one Europe, all together, instead of a community divided in different countries which have nothing to do with each other

Respect each other, work well together and understanding

To make people who could be respectful with the environment

I think that the European citizenship have to respect the environment

To have more equality

It means a European union with all helping each other

It means for me, the possibility of knowing others culture and I can learn about these

I think that these activities are very interesting to adolescent persons.

a place where we are liberty

To say some European rules which consider respect, tolerance and taking care of the environment  
Improve the economy

It means live in a better world, reducing pollution and also, be in contact with people from the different countries and know a bit more about their cultures.

It means learn about different people and learn about their countries

That we all fight together for the same customs, we have the same currency, etc.

That Europe is the same country

Let all the countries of Europe keep us together

## ESC – a Global Challenge

If you want, you can write here a comment about these activities, this kind of project, ...

I think for this type of project should not be proposed only good students for the meeting due to many times , for example in my case , to be dedicated 100 % to the project and to give a good image of your school and have bad grades , and for example, during the meeting in Spain , the most communicative Portuguese student among students from various countries ... And most of the time , students with better grades are not dedicated so much to the project, giving a little bad image of your school, and providing information for students who want to participate in meetings , false , for example "we do not work there anything," however, those who were 100 % dedicated worked hard ...

I really love it, when I was in Spain I've met many nice students (especially Turkish students ^^) and I am very happy because we have kept contact between us. We could discover and learn new things together and we had fun very well!! I've also hosted an European student at home this year and it was just great!! I could improve my English.Thanks for everything, to everybody, teachers as students, because we need that each one involves oneself to share good moments!! Thank you!!! :)

If you have the opportunity to participate, don't hesitate, you will not regret it.

Best day in my life, Best week in my life :)

I think this project is very important to have real informations about other countries and different cultures and was a nice experience.

This kind of project is necessary to enrich people and to develop our language skills and connect with different cultures.

I think that this project is very innovative beacuse in this project you know people that they are in other country and for speak with them you must speak english and this is the the most beautiful part of the project

this kind os projects will help us to be more open minded and to have more love for the other ,to be helpfull and careful.

I think this project is so nice and exciting, we can meet different people, get enriched with other cultures and learn a lot. I would really like to repeat this experience

Goverments must keep doing these projects, it's the best way to improve our knowledge and to open our minds  
we must work hard but we were with the experience for a lifetime.

This type of project makes us aware and act in another way

It is a good idea to improve students English
