

[Panetti-Pitagora Institute](#)

Since September 1st 2015, the 2 Institutes "Panetti" and "Pythagoras" merged into 1 Institute "I.I.S.S. "Pythagoras Panetti" to give life to a great technological center in Bari, with a wide and articulated offering: Construction Environment and Territory, Materials Chemistry and Biotechnology, Electronics, Electrical Engineering and Automation Technology, Computer Science Technology, Telecommunication, and an evening course in Electrical and Automation Technology.

Panetti

The Institute Tecnico Tecnologico "Modesto Panetti" works in the territory with the specializations in Materials Chemistry and Biotechnology, Electrical and Automation Technology, Electronics, Computer Science and Communication Technology, and an evening course in Electrical and Automation Technology.

Over the years it has gradually renovated to meet in a more living way and be adapted to new needs of the community, the citizens and the student's planning towards the future college and / or working environment.

The regional analysis and the detection of training needs, carried out on teachers, students and parents, have confirmed that the Institute is the meeting point for the purposes devolving upon it, including the users' expectations and the socio-economic reality inside which it is placed.

In a world of work that demands more and more solid basic training, advanced expertise and ductility, the ITT "Modesto Panetti" intends to satisfy the legitimate expectations of the students and families, using all possibilities offered by the new legislation on the school's autonomy.

In this sense, they highlight the of the routes for the " school / work alternating training " and Certifications denoting the Institute's mission: a school that changes to technological innovation and the demands of the working world.
