

The Magic Scarecrow

An interactive storybook

The Task: Smell

- **The idea of the story:**

Everything in the garden has got qualities which make sure that people pay attention. Only the little herbs don't have anything and they are very sad about that. The magic scarecrow wants to help. She conjures a very special and beautiful smell for each herb. People who are coming in the evening to the garden perceive them immediately and enjoy the smell. The herbs are proud and the scarecrow is happy.

- **The development of elements in the book**

- In the beginning: Everything is coloured except the herbs.
- In the middle: Everything is coloured.
- In the end: Only the herbs are coloured because of their outstanding qualities.

- **The method**

- Pupils should act while hearing the story (put elements on the right places).
- Herbs should be named several times.
- Real herbs should be available in class or the story should be told in the garden.
(Connect picture with the concrete plant. Connect smell with sight, touch and term.)
- Last page: Control of the learning objective.
